

How to share Smartphone Internet via Router?

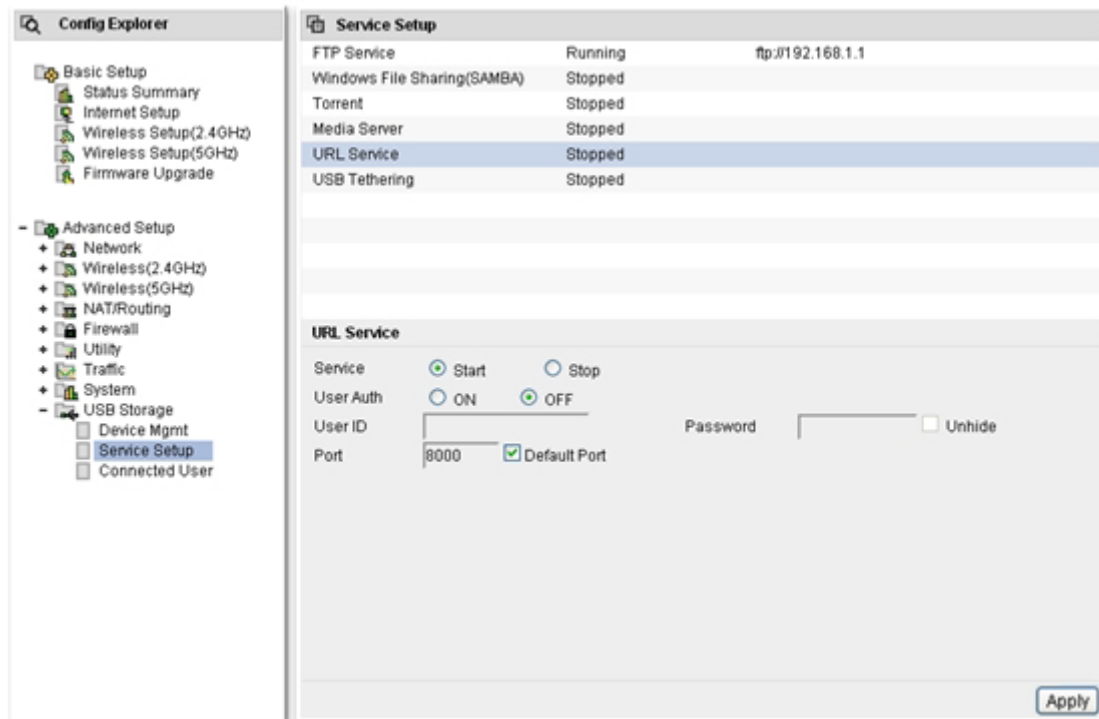

It is suitable for: **A2004NS,A5004NS,A6004NS**

Application introduction:

TOTOLINK Routers with one USB port supports URL Service to make file sharing easier.

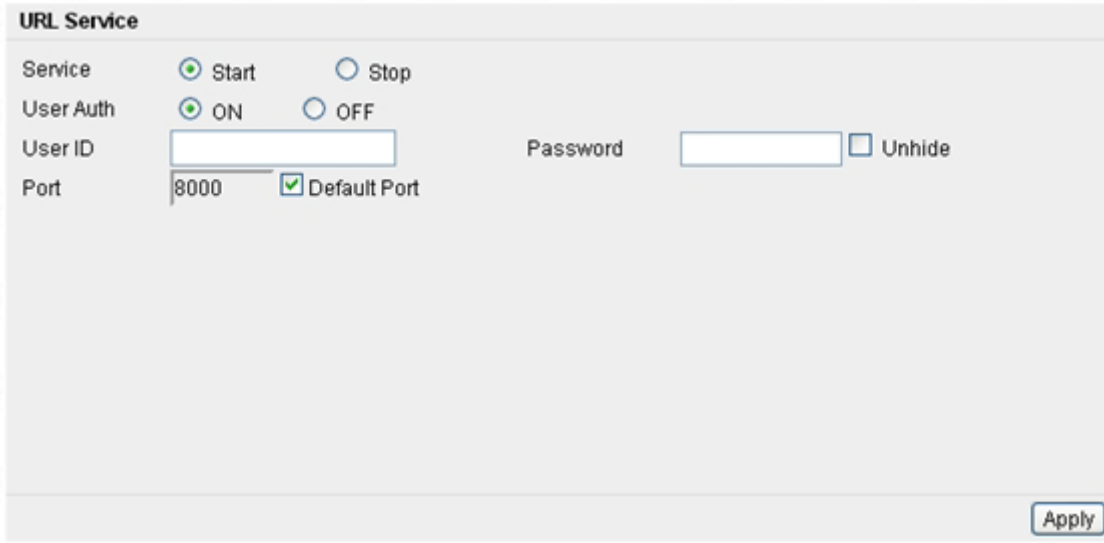

STEP-1:

Log into the Web page, choose **Advanced Setup ->USB Storage ->Service Setup**. Click **USB Service**.

STEP-2:

The URL Service page will show up below and please choose **Start** to enable the service.

User Auth: enable or disable login authentication.

User ID & Password:

If you enabled login authentication, please provide the User ID & Password for verifying.

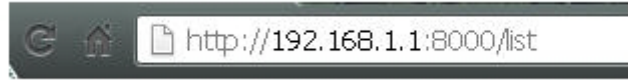

Port: enter the port number to use, the default is 8000.

STEP-3:

Then connect to the router by cable or WiFi.

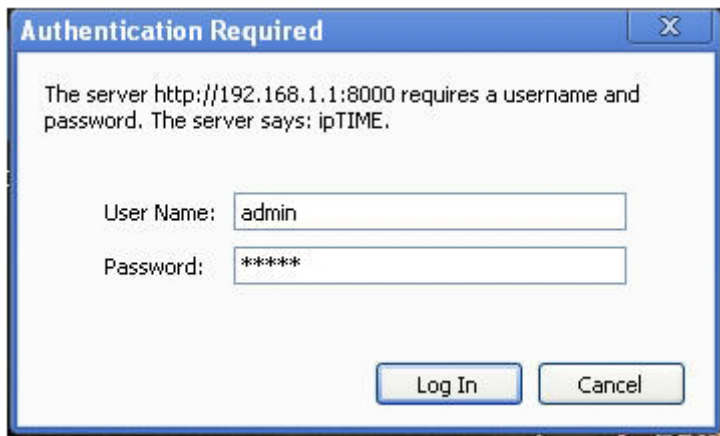

STEP-4:

Type in the website (URL to connect) to the address bar of the web browser.

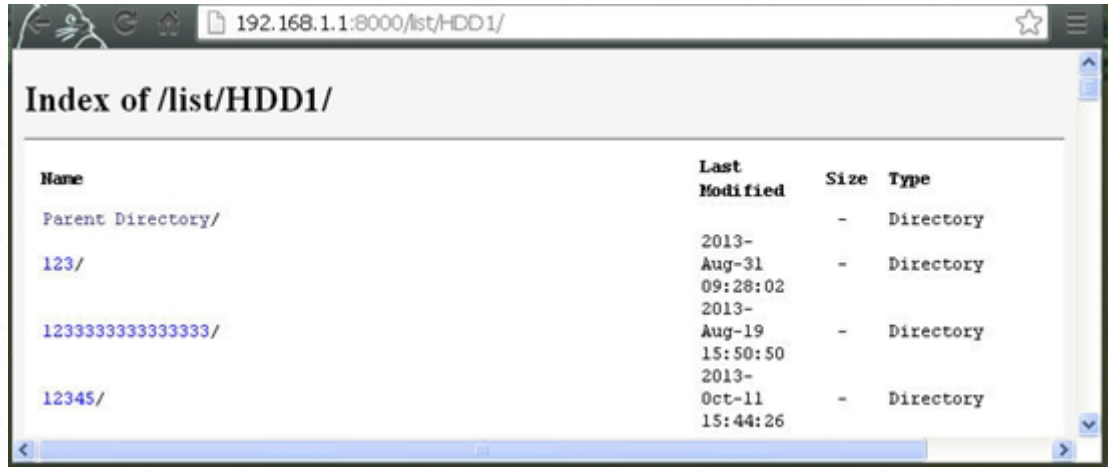

STEP-5:

Enter the User name and password that you have set before, and then click Log In.

STEP-6:

The list interface will appear and double click the file name of your USB device (e.g.HDD1).

STEP-7:

Now you can visit and download the data in the USB storage.
