How to setup Smart QoS?

It is suitable for: A1004, A2004NS, A5004NS, A6004NS

Application:

When there are too many PCs in LAN, it is difficult to set speed limit rules for every computer. You can use smart QoS function to assign equal bandwidth for each PC.

STEP-1:

Stores the resource you want to share with others into the USB flash disk or hard drive before you plug it into the USB port of the router.

STEP-2:

Connect your computer to the router by cable or wireless, then login the router by entering http://192.168.1.1 into the address bar of your browser.

← → C ③ 192.168.1.1

Note:

The default access address varies depending on the actual situation. Please find it on the bottom label of the product.

STEP-3: Enable Smart QoS

3-1. Click Device Mgmt on the sidebar.

3-2. The Device Mgmt interface will show you the status and the storage information (file system, free space and total size of the device) about the USB device. Please make sure that the status is connected and the USB led indicator is lighting.

Device Mgmt					
USB Status					
USB Device Name	Class	S	tatus		
USB Device1	Storage Dev	ice C	onnected	Remove	
USB Storage Infomat	ion				
USB Device Name	Directory	File System	Total	Free	
T TOTTO					

STEP-4: Enable Smart QoS

4-1. Click Service Setup on the sidebar.

4-2. Click *Start* to enable FTP service and enter the other parameters refer to the introductions below.

Service	Start	Stop			
Character Set FTP Port	UTF-8 21	▼ Default Port			
User Configuration	Property	User ID	F	Password	
	Read/Write •]			Unhide
	Read/Write •]			Unhide
	OFF 🔻]			Unhide
	OFF v				Unhide
	OFF 🔻				Unhide
					Apply

FTP Port: enter the FTP port number to use, the default is 21.

Character Set: setup the unicode transformation format, the default is UTF-8.

User ID & Password: provide the User ID & Password for verifying while enter the FTP server.

STEP-5: Connect to the router by wire or wireless.

STEP-6: Enter ftp://192.168.1.1 in the address bar of My Computer or the web browser.

STEP-7: Enter the User name and password that you have set before, and then click Log On.

log On	As			×			
۴	Either the server does not allow anonymous logins or the e-mail address was not accepted.						
	FTP server:	192.168.1.1					
	User name:	admin 💌					
	Password:	•••••					
	After you log on, you can add this server to your Favorites and return to it easily.						
۸	FTP does not encrypt or encode passwords or data before sending them to the server. To protect the security of your passwords and data, use Web Folders (WebDAV) instead.						
	Learn more about using Web Folders.						
	Log on anonymously Save password						
			Log On Cancel				

STEP-8: You can visit the data in the USB device now.
