A2004NS FTP server instal
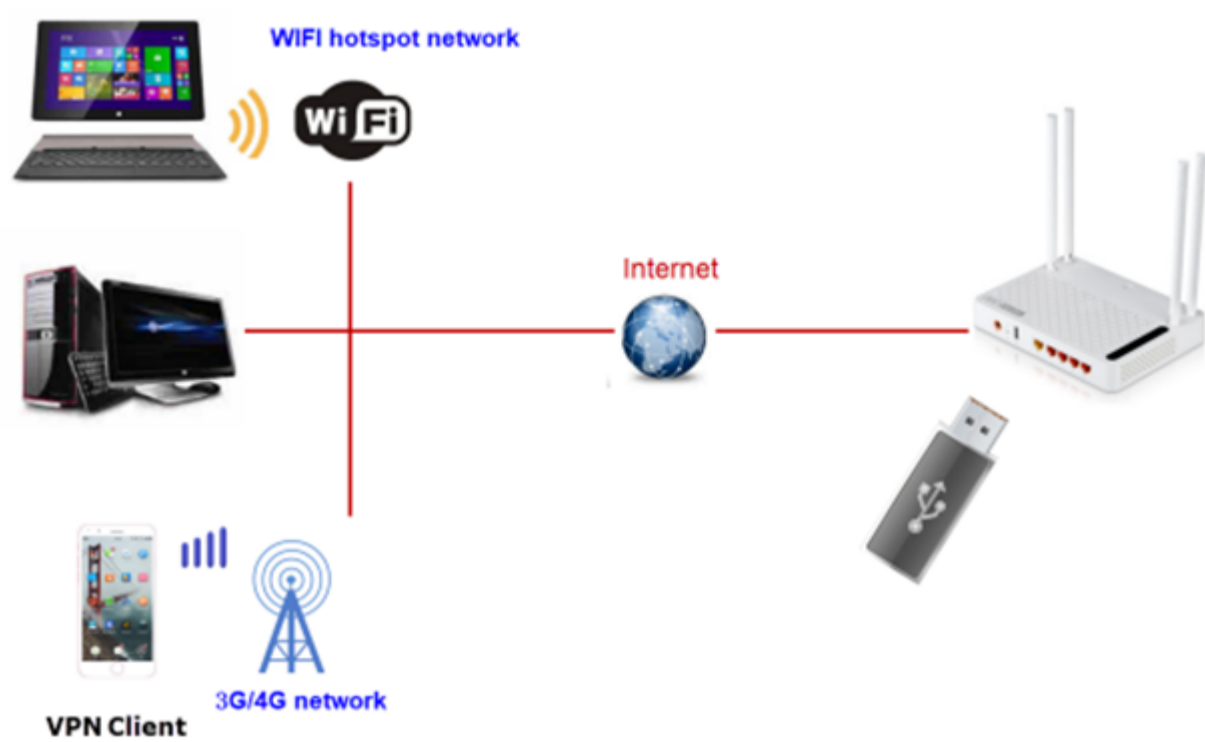

How do we implement remote access to A2004NS USB shared storage files?

The operation of this document applies to the following models: **A2004NS, A5004NS, A6004NS**
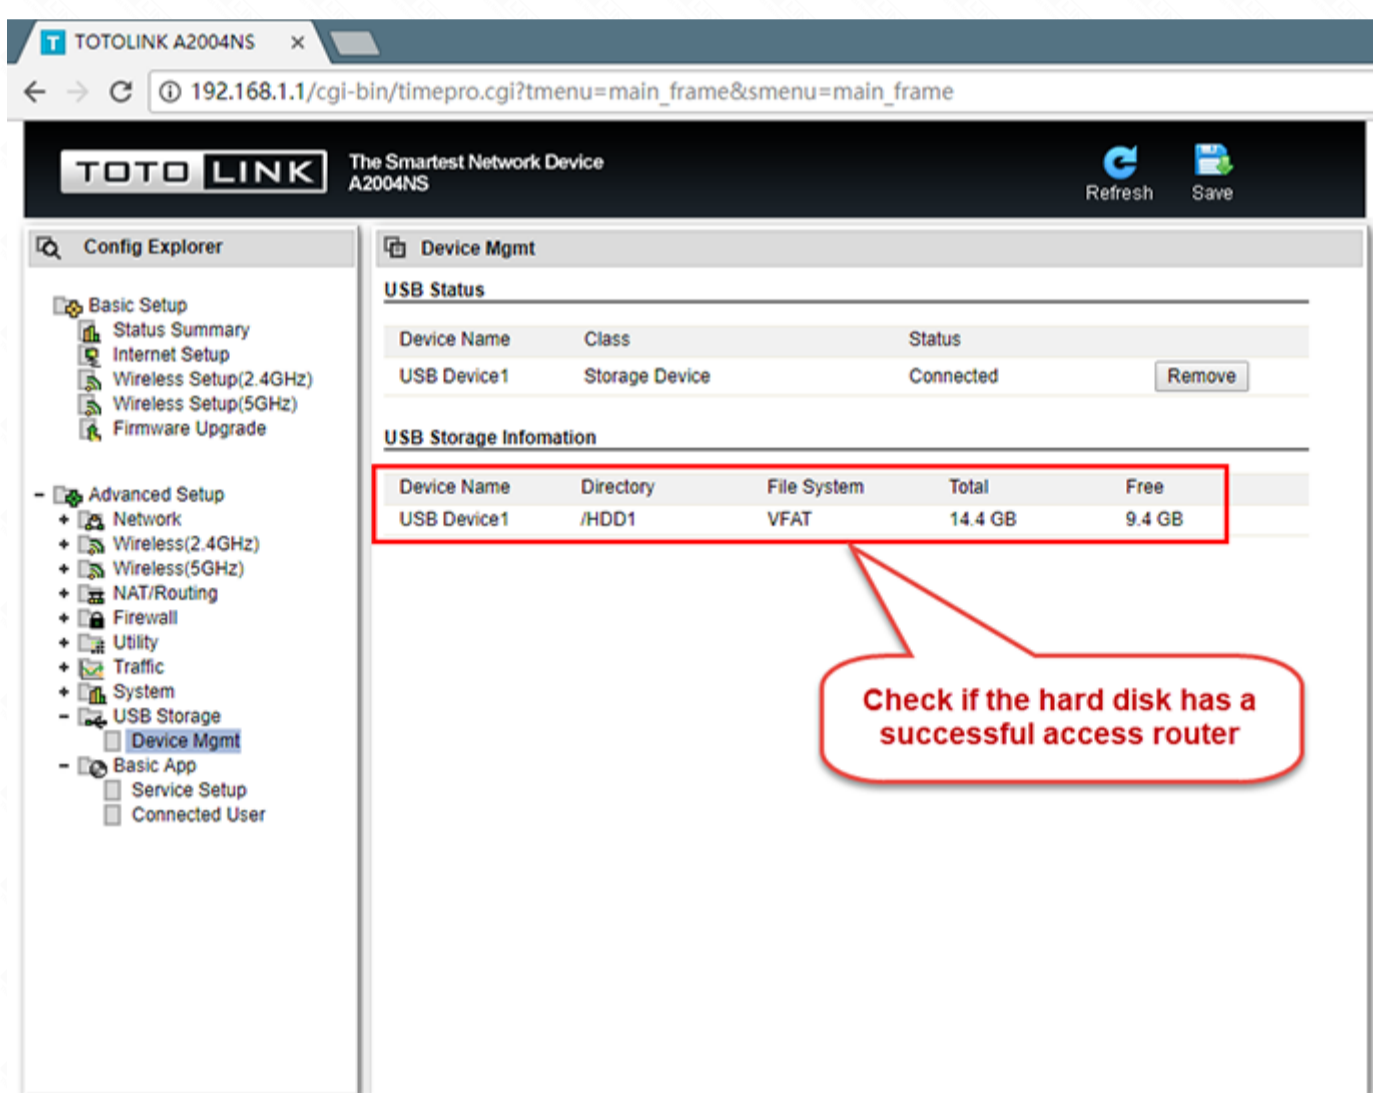

Application:

A2004NS support local area network and public network file sharing function. Connect a removable storage device (such as a USB flash drive, mobile hard disk, etc.) to the USB interface of the router. LAN or external network terminal equipment csan access the resources in the mobile storage device, easy to achieve file sharing.
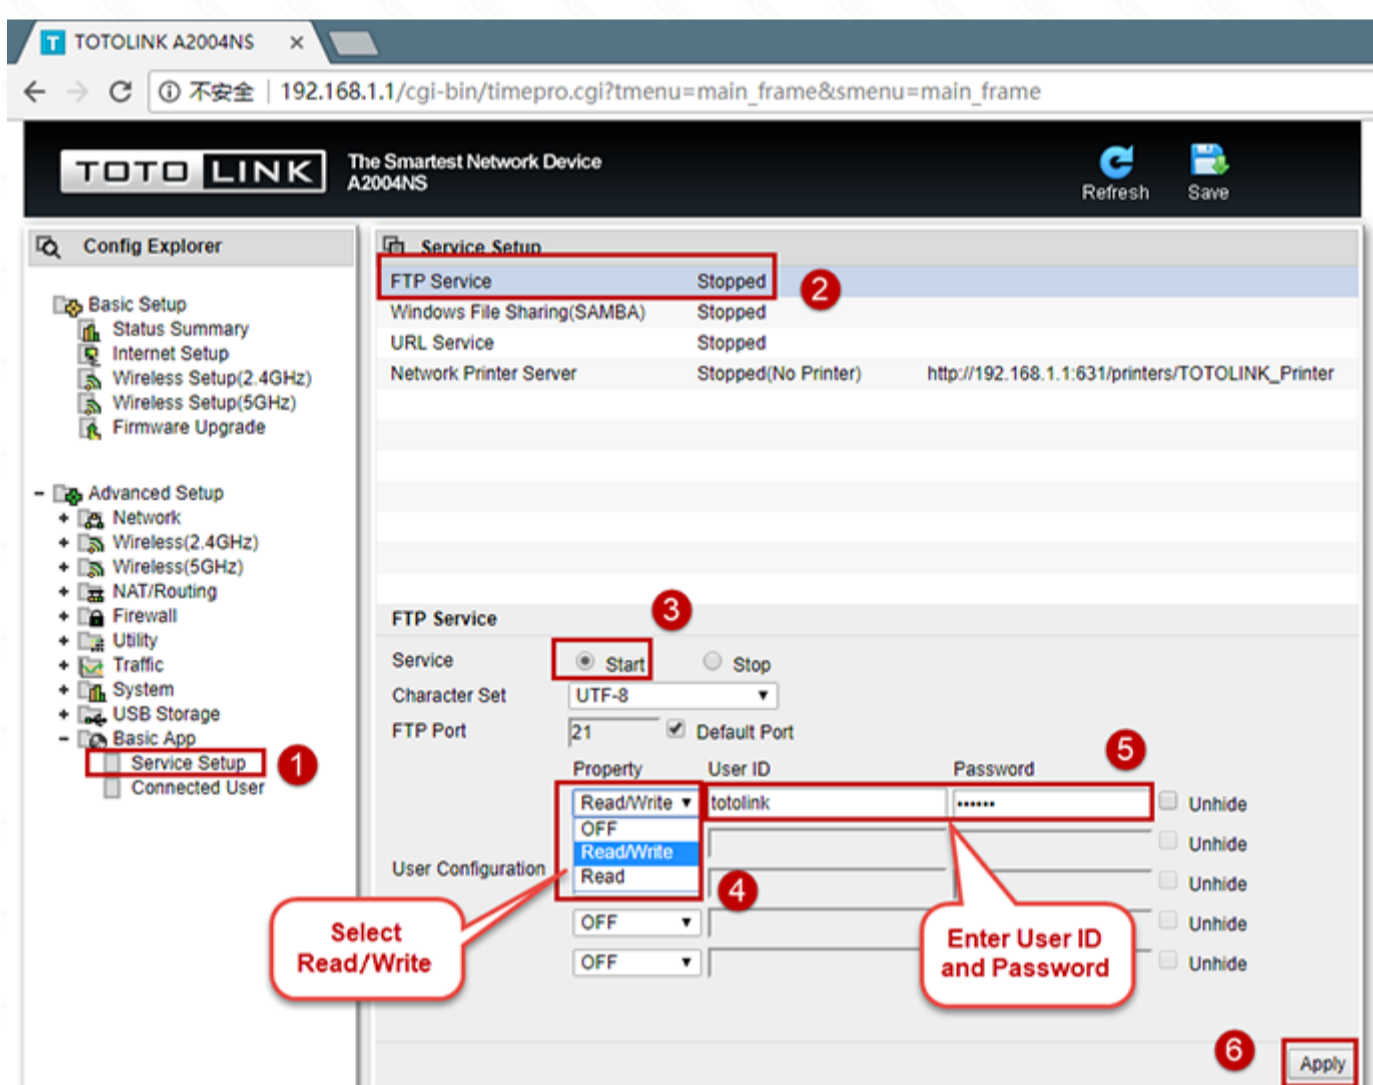

Diagram

Set up steps

STEP-1: Check if the hard disk has a successful access router

STEP-2: FTP server build

STEP-3: Access the FTP server from the client, and use the resources inside.
