

A2004NS URL filtering

It is suitable for: **A1004, A2004NS, A5004NS, A6004NS**

Application:

The TOTOLINK Routers offer a URL filter feature that helps you to achieve your goal by just several steps on the web-gui. It could help to filter http websites by keywords or URL. Here we go with a A2004NS.

STEP-1: Connect your computer to the router

1-1. Connect your computer to the router by cable or wireless, then login the router by entering http://192.168.1.1 into the address bar of your browser.

Note:

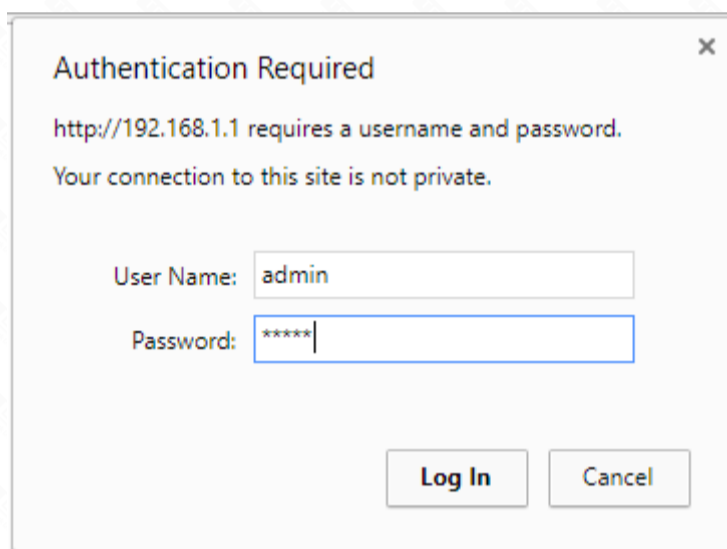

The default access address varies depending on the actual situation. Please find it on the bottom label of the product.

1-2. Please click Setup Tool to enter the router's setting interface.

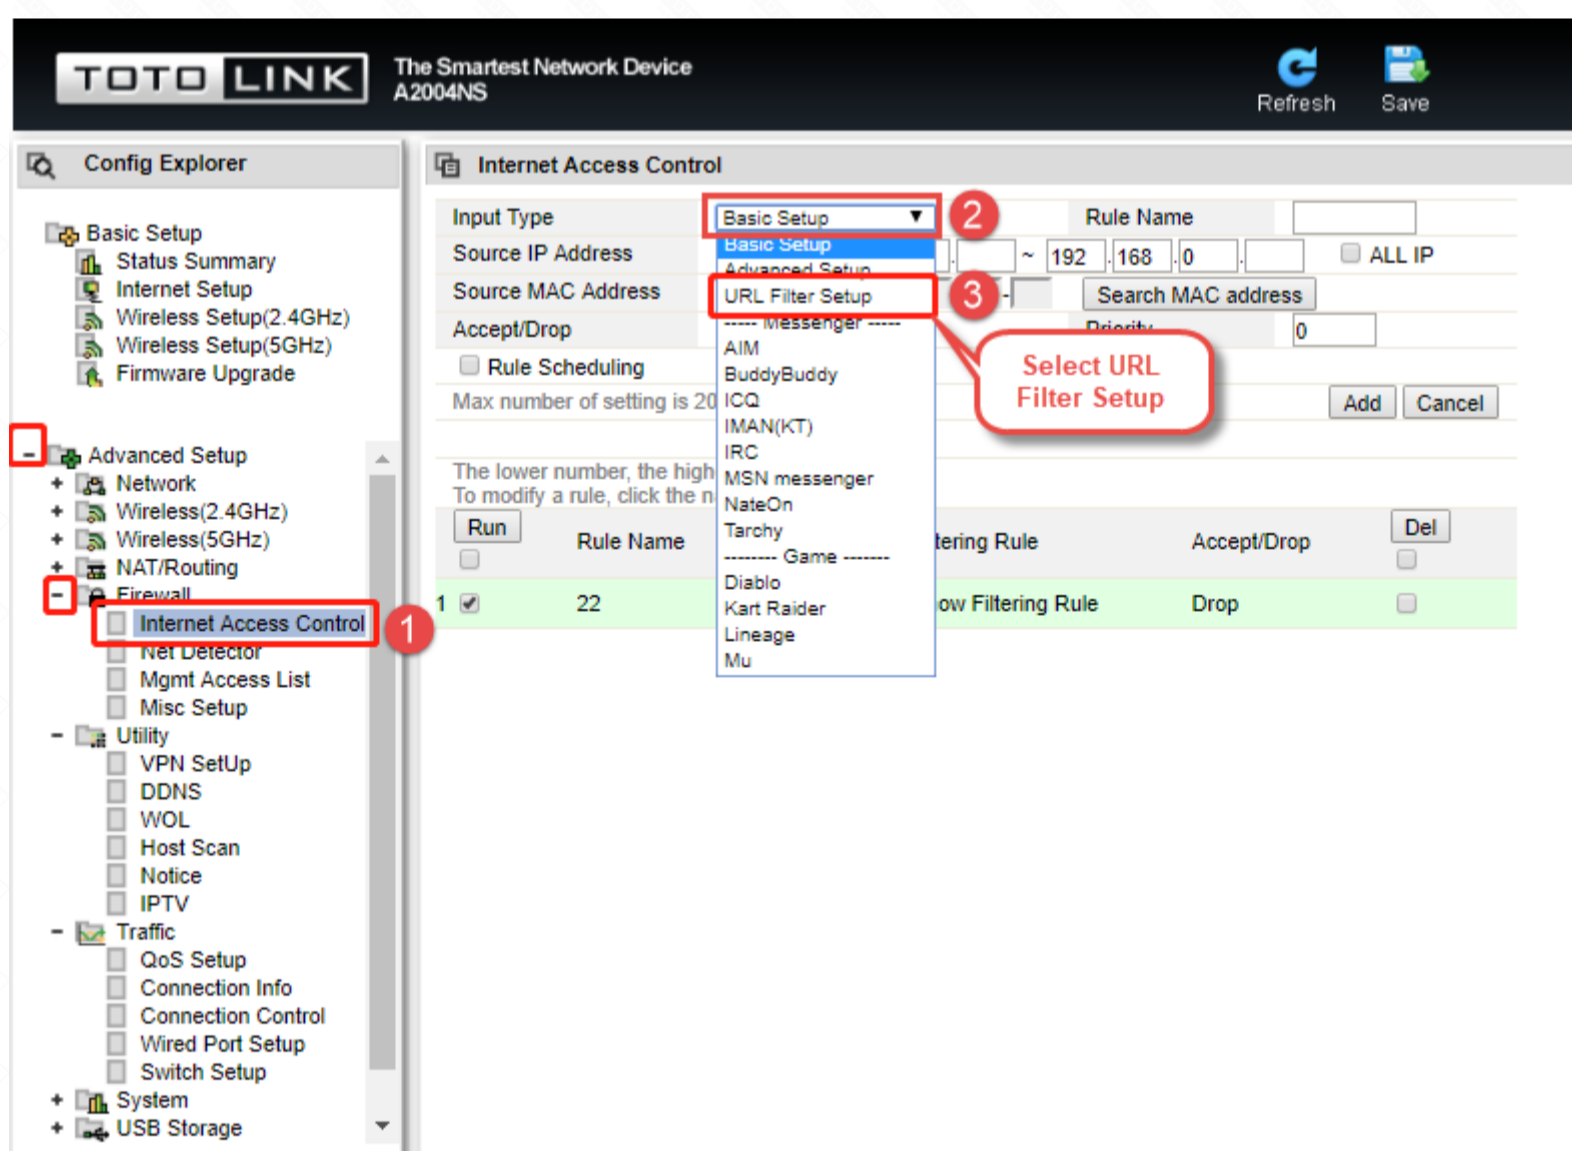

1-3. Please login to the Web Setup interface (the default user name and password is admin).

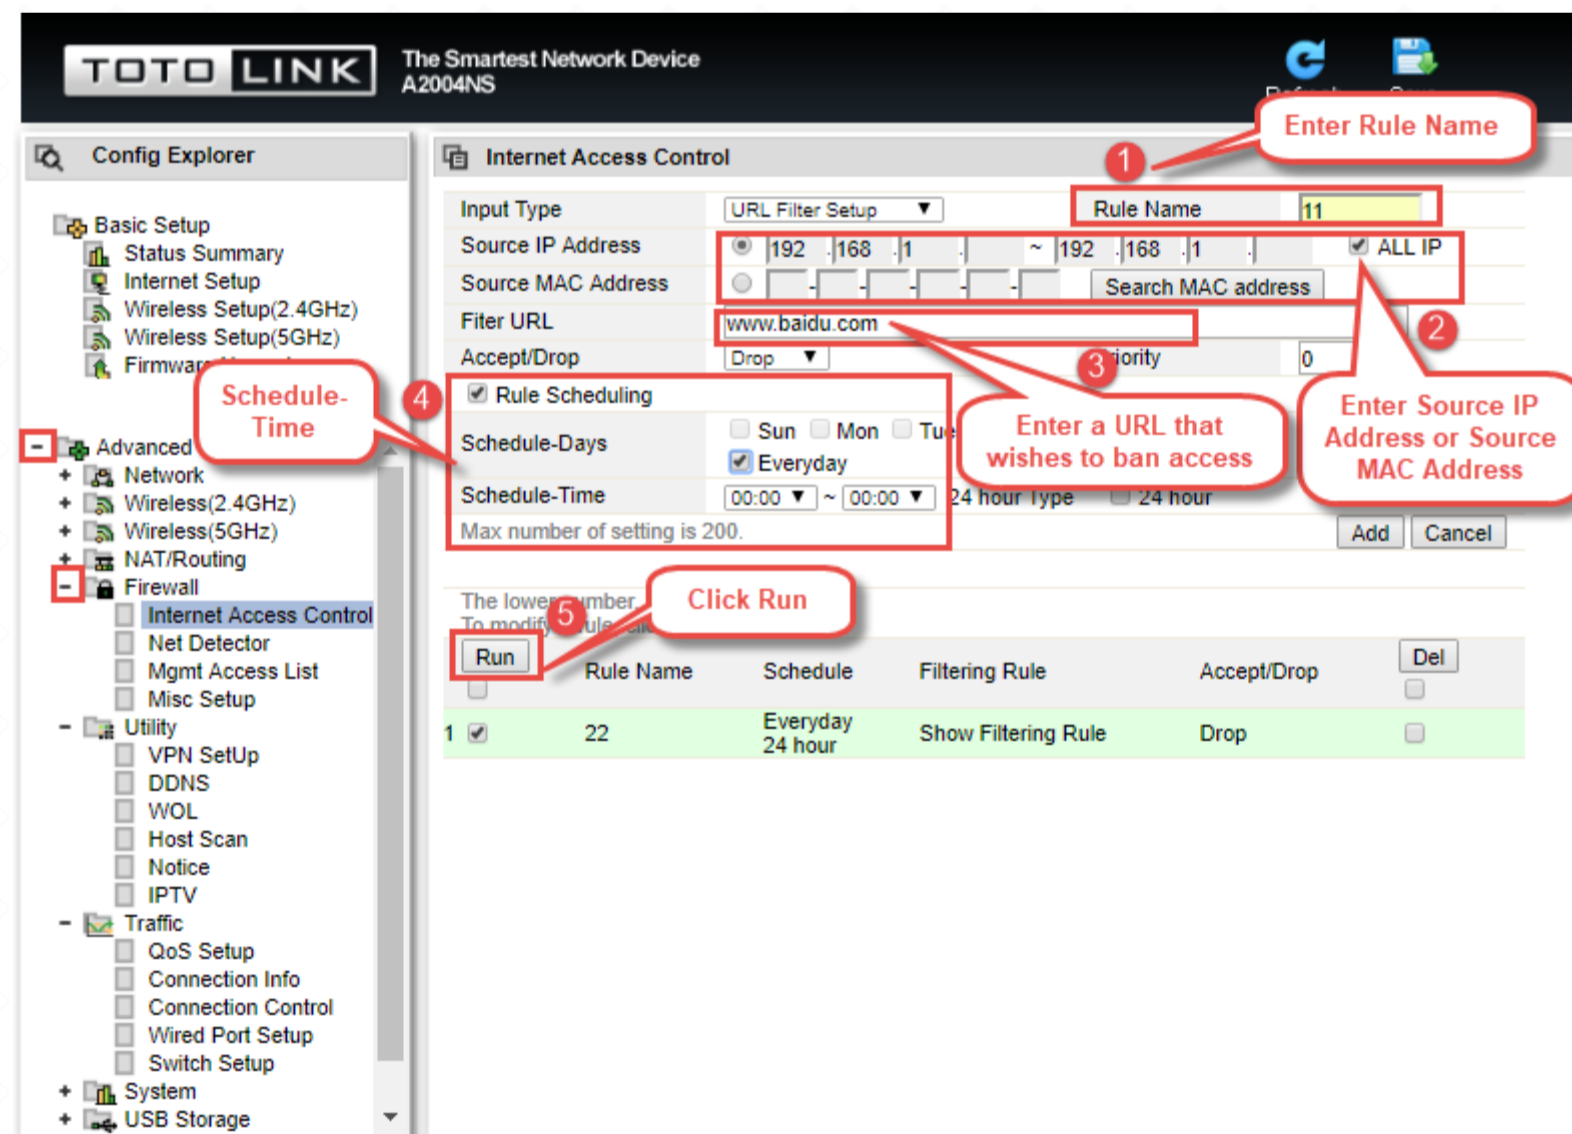

STEP-2: Follow the steps below to set

2-1. In Internet Access Control, first we should check the Input Type, then select the URL Filter Setup listed below.

2-2. Next we need to set the URL rules.

Note:

- 1.prefix can not add http: //
- 2.Some sites are not supported()
- 3.Once unsuccessful, you can try several times.
