## Power Supply Modes

### LED Indicators

LED Indicator	Status	Activity
Ext	Lights red	Connected to Power supply equipment(PSE)
	Lights orange	After power-on
	Two colors (red and orange) exchange flash	Press RST/WPS button for 1-2 seconds
	Lights green	Successful Wi-Fi connection to upper router
	Blinks orange quickly	Press RST/WPS button for more than 5 seconds

### Button

Button	Description
RST/WPS	Press the button for 1-2 seconds, WPS function enabled.
	Press the button for more than 5 seconds, the device will restored to factory default settings.

## Method One: Easy Setup by WPS Button

One-click WPS connection makes it easy to extend the coverage of your existing wireless network.

1 Press WPS button on the router.

2 Press the RST/WPS button on EX100 for about 1-2s within 2 minutes.

3 Wireless connection is established, the SSID of EX100 will change to the upper router's SSID.

### TIPS:

You can put EX100 close to the router to do the WPS connection, then place it anywhere within the Wi-Fi range. EX100 could remember the last connected Wi-Fi and auto connect to it when powered on.

## Method Two: Setup via Smart Phone

If your router don't have a WPS button or you failed to connect to upper router by WPS, please setup EX100 by your Smart phone.

### iOS Phone

- Click **Settings**.
- Choose **Wi-Fi**.
- Select **TOTOLINK Ext** (default SSID), no password required.
- After successfully connecting, the Log in page pops up automatically. Click **GO**.
- All available SSIDs are displayed. Please choose the one you want to extend its Wi-Fi signal.
- Enter the right **Key**(password). Here you're allowed to setup the EX100's separated SSID and password as you want or keep it the same as upper AP. Click **Connect**.
- Upon a successful connection, the device turns back to the **Wi-Fi** page automatically. Please choose the extender's new SSID.
- Type in the password, click **Join**.
- Connection Successfully.
- Try any website to test the Internet.

### Android Phone

- Click **Settings**.
- Choose **Wi-Fi**.
- Select **TOTOLINK Ext** (default SSID), no password required.
- After successfully connecting, the Log in page pops up automatically. Click **GO**.
- All available SSIDs are displayed. Please choose the one you want to extend its Wi-Fi signal.
- Enter the right **Key** (password). Here you're allowed to setup the EX100's separated SSID and password as you want or keep it the same as upper AP. Click **Connect**.
- Wait for a while, the system reminds you to reconnect Wi-Fi.
- Get back to the **Wi-Fi** page manually, choose EX100's new SSID.
- Type in the password, click **Connect**.
- Connection Successfully.
- Try any website to test the Internet.
