4 FAQ (Frequently Asked Questions)

① **What can I do if the login page does not appear?**

1. Check your computer's IP address, make sure it is set to "Obtain an IP address automatically". Steps: right click **Network—Properties—Change adapter settings---Local Area Connection—Properties—Internet Protocol Version 4(TCP/IPv4)**.
2. Make sure you enter the correct default access: **192.168.0.1**. Try again.
3. Use another web browser and try again.
4. Reboot your router and try again.

② **What can I do if I cannot access the Internet?**

1. Check the Internet status by connecting a computer directly to the modem via Ethernet cable. If it is not working properly, contact your Internet Service Provider.
2. Setup your router again according to part **2 Configure the Router.**
3. Reboot your cable modem (if have) and router, then try again.

③ **How to reset the router to factory default Settings?**

Keep the router powered on, press the RST/WPS button on router about 10 seconds, it will restore to factory default settings.
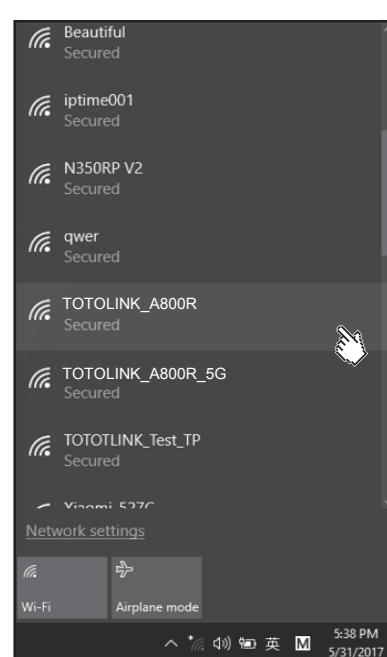

④ **What can I do if I forget the router's Web login User Name and Password?**

In case you changed your router's Login User Name and Password, we suggest you reset your router to factory default settings by above operations. Then use the following parameters to login the router's Web interface: **Default IP address: 192.168.0.1, User Name: admin, Password: admin**
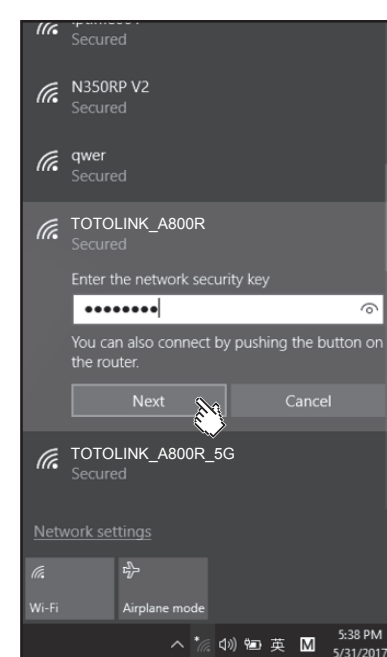

⑤ **What can I do if I forget my wireless network Password?**

By default, TOTOLINK router don't have any wireless network password. If you have set one, please log in to router's Web Management page, go to **5G Wireless---Basic Settings** or **2.4G Wireless — Basic Settings** to obtain or reset your password.
